

CALL FOR PAPERS

Special Session on Demand Response integration in the Smart Grid

to be held in the frame of
IECON 2013 - The 39th Annual Conference of the IEEE Industrial Electronics Society
10th - 13th of November 2013, Austria Center, Vienna, Austria

TOPIC OF THE SPECIAL SESSION

The challenges of successful integration of renewable energy resources in to the electricity grid will require additional power system flexibility. Demand response (DR) may be able to provide this flexibility at low cost. Many DR studies have been conducted and various algorithms have been developed. Now smart decisions need to be made in order to select the most appropriate solutions.

Topics of interest of this special session include, but are not limited to:

- Scalable, decentralized decision making tools for DR
- DR program design and the role of aggregators
- Market-based demand response and load elasticity
- Aggregated load modeling, planning, and real-time control
- Demand response potential analyses

SPECIAL SESSION ORGANISATION

Sara Ghaemi
sara.ghaemi@ait.ac.at

Christian Elbe
christian.elbe@tugraz.at

The organizers look forward to welcoming you to Vienna, Austria from 10th to 13th November 2013.

Important Dates

Regular Paper submission:	April 01, 2013
Notification of acceptance:	June 15, 2013
Final submission:	August 01, 2013

SUBMISSION OF PAPERS

The working language of the conference is English. Submit the full paper as PDF following the IEEE layout requirements by using the templates given at the conference web page. Accepted and presented papers will be published in an IEEE Proceedings volume and will be sent to IEEE Xplore. In addition, selected authors are encouraged to submit their papers for publication in the IEEE Transactions on Industrial Electronics or in the IEEE Transactions on Industrial Informatics.

THE CONFERENCE

IECON 2013 is the 39th Annual Conference of the IEEE Industrial Electronics Society, focusing on industrial and manufacturing theory and applications of electronics, controls, communications, instrumentation and computational intelligence. The objectives of the conference are to provide high quality research and professional interactions for the advancement of science, technology, and fellowship.

Papers with new research results are encouraged for submission. IECON 2013

will be held concurrently with the 7th IEEE International Conference on E-Learning in Industrial Electronics (ICE-LIE 2013). Participation in any of these events just requires a single conference registration fee. The world's industry, research, and academia are cordially invited to participate in the wealth of presentations, tutorials, special sessions and social activities, and furthermore, enjoy beautiful Vienna.
